A Solution For Hardwater Problems

SCALE TERMINATOR

Clean Fabrics

Healthy hair

Soft Skin

Scale Terminator

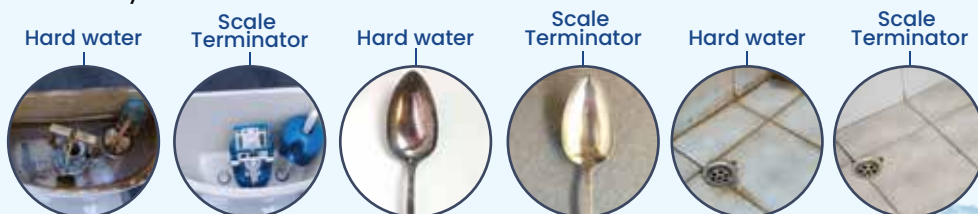

Scale Terminator is a Microprocessor based device which creates frequency modulated electromagnetic field inside the water supply pipe, that field forces dissolves calcium, magnesium and bicarbonate ions to create the non Crystallizing nuclei of calcium & magnesium carbonate in the water. This micro crystal's flow with water in the form of suspended particles. Their size and shape much differs than those formed in untreated water. They don't stick at the pipe walls, heating elements of water heater or washing machines, etc. They remain in suspension until discharged to drain. The precipitation of loosely particles can be easily wipe off.

Working

Applications

Scale Terminator can be install in many such places like Apartments, Houses, Hotels, Swimming Pools, Industries, Processing Plants, Boiler House Restaurants, Heat Exchanger, Holiday Cottages, Cooling Tower, Agriculture and many more.

Benefits

- Machinery And Equipment Perform More Reliably Like Geysers, Dishwasher, Washing machines etc.
- Reduces And Prevents Scale Deposits Throughout The Entire Piping System.
- Prevents Hair fall, Skin damage and other effects due to hard water.
- Prevents Fabrics from losing their color & material quality.
- Gardens, agriculture & solar washing sprinklers.
- Increases life span of bathroom appliances like faucets, showers etc.

What is Hard Water?

Hard water, is water that contains a high quantity of dissolved minerals (like calcium and magnesium).

What is Soft Water?

Soft water is in which unsaturation of minerals is low and ions of calcium and magnesium are neutral that result to prevent further scaling formation with high solubility.

Specification

Specification				
Specification	ST-I	ST-II	ST-III	ST-IV
Pipe Size Diameter in mm	25mm	50mm	75mm	100mm
Electromagnetic Strength	0.414N			
Voltage Jerk Caring Capacity	4 KV			
Voltage Output to	15 Volts D.C.			
Out Put Up to	15 Khz.			
Out Put Current	250 mA	500 mA	750 mA	1000 mA
Power	5 Watt	8 Watt	12 Watt	15 Watt
Universal Power Supply	100 Volts to 300 Volts, 50Hz. Single Phase A.C.			
Weight - Approx	1.0Kg	1.0Kg	1.5Kg	1.7Kg
